Dear Public Service Commission,

I am a Dominion customer and I would like to strongly and enthusiastically request a hearing on Dominion's long-term resource plan. I am deeply concerned that the current Resource Plan extend coal plan usage and make major investments in gas infrastructure. Our world is dying at the hands of fossil fuel consumption. The unprecedented events that are our inflicting the globe this summer are directly influenced by green house gases. This plan is not only not helping but exacerbating the current situation.

We need public input now more than ever.

Thank you,  
Amy Bradshaw
